The diagram shows the SPI interface connections between the STM32 and ESP32. The STM32's SPI3_SCK, SPI3_MOSI, SPI3_MISO, and SPI3_CS0 pins are connected to the ESP32's SPI2_SCK, SPI2_MOSI, SPI2_MISO, and SPI2_CS0 pins respectively. A 10k pull-down resistor is connected between the STM32's SPI3_CS0 pin and ground, and a 3.3V supply is connected to the ESP32's SPI2_CS0 pin.
